

Visualize your data with Power BI for US DOD

Join our US DOD-based Power BI experts for a full-day hands-on workshop to learn how to connect to a data source (e.g., Excel spreadsheet) and create visual analytics and interactive insights for your data. Workshop participants will experience firsthand how to create powerful reports and dashboards in just minutes!

Engagement Details

Engagement Type	Workshop (Instructor Led Training)
Duration	1 Day (8 hours)
Cloud	US DOD IL5
Audience	End Users, Power Users
Skill Level	150
Location	Onsite or Microsoft office
Max attendees	15

Outcomes

- Realize the possibilities and potential of the Microsoft Power Platform – quickly making, managing, and sharing reports and dashboards securely within your existing Office 365 DOD IL5 cloud
- Enable information workers and leadership to drive confident decision-making through insights derived from real-time data
- Visualize and share meaningful mission data on a secure cloud platform

Delivery Agenda

Note:

Please review and discuss the requirements with your Customer Success Account Manager and a Cloud Solution Architect prior to scheduling.

For the most authentic and complete experience, we highly recommend using your own DOD IL5 tenant. Each attendee will require the following:

- Government issued laptop (Windows 10+ only)
- DOD M365 IL5 enabled account
- M365 G3 or G5 license assigned
- Power BI Free¹, Pro² or Premium license assigned
- OneDrive for Business enabled
- Microsoft Teams license
- Direct or VPN connectivity to DOD IL5 Tenant³
- Power BI Desktop installed or admin permissions to install software

If you cannot support these prerequisites, Commercial tenants are available. Note that the experience will not be identical to your DOD IL5 environment. Attendees can bring a personal laptop with internet access with the ability to install software.

(1) Power BI Free is limited to Power BI Desktop only.

(2) Power BI Web requires a Power BI Pro or G5 license.

(3) Power BI Desktop requires VPN or direct connectivity to M365 for publishing

Topics Covered
